

AL100 / AL100HD

True Blue Outside Lift You Can Count On

A DURABLE POWERHOUSE

The AL100 / AL100HD are durable lifters with weight capacities of 350 lb / 400 lb. The AL100HD is the heavy lifter and is the only 400 lb weight capacity on the market. These universal scooter lifts are the most popular on the market. Why? Because of its durable aluminum platform, engineering, and effortless operation, this lift endures the test of time and weather. Its unique automatic hold-down foot secures the scooter. No scooter modifications are required for this lift.

We design our lifts with you in mind. Offering more customized platform sizes that are 15 to 25% lighter than others, which means you save money on fuel.

EASY CARGO ACCESS

Our lightweight swing-away is our latest accessory for your outside auto lift. This innovative design uses a new I-beam construction, resulting in a 13 lb reduction that provides you with greater handling and steering.

YOU CAN COUNT ON IT

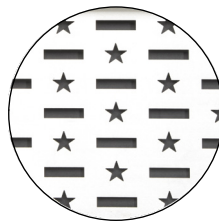

AL100/AL100HD

Toggle switch to rise and lower lift with ease.

Automatic hold-down foot secures your scooter and power chair for you. No bending needed.

Harmer's patriotic Stars -N- Stripes platforms are engineered for maximum strength.

I've had my AL100 for years. It's true BLUE, easy to use, and stands up against the harshest of climates.
